

HEARING PROTECTION

Hearing Protection Guide

Below is a chart that gives you an overview of which hearing protection may be suitable based on the noise level.

Hearing Protection Size and fit

Everyone's ear canal is unique — much like a fingerprint. Which is why it's so important that you choose adequate and suitable hearing protection that is the correct size and form and delivers a good fit. Try out multiple options and sizes for best experience.

- If the earplugs are too big, they are unlikely to sit deep enough in the ear canal, so the specified protection level cannot be achieved. They'll also feel uncomfortable
- If the earplugs are too small, although they may be comfortable to wear, there could be noise leakage and reduced protection capacity which over time can cause noise-induced hearing loss
- Round earplugs don't necessarily completely seal an oval-shaped ear canal, hence the products with exact-fit technology in our offering
